AGENDA

STAKEHOLDER PANEL DISCUSSION of the

BONUS symposium on 'Science delivery of sustainable use of the Baltic Sea living resources

Tallinn University Conference Center, Mare building, Tallinn hall, Uus-Sadama 5, Tallinn, Estonia

19 October 2017

9:00-9:45 Keynote presentation by Jason Link (United States)

9:45-10:45 Main challenges of integrating multiple interests in sustainable ecosystem management (moderated by Georg Martin, University of Tartu)

✓ Who are the main players and what are the possible conflicting interests?
✓ Do we know enough about marine ecosystem structure and functioning to make informed/wise decisions?
✓ Is international cooperation sufficiently active and efficient to address directives and policies?
✓ How do bioengineering, aquaculture, and new marine installations fit into the context?

10:45-11:00 Coffee break

11:00-12:00 Main challenges of sustainable balanced management in fisheries (moderated by Kaire Märtin, Ministry of Environment of Estonia)

✓ From single to multispecies management: mismatch between the need and reality
✓ Spatial management of marine living resources
✓ Making the ecosystem-based approach operational: impact on food webs, carbon sequestration, habitats and genetic diversity
✓ Future challenges of the Baltic fisheries management under global change

12:00-13:00 Main challenges for matching research and policy/management needs (moderated by Liina Eek, Estonian Research Council)

✓ How to ensure knowledge transfer from science to management and policy decisions?
✓ How to overcome the mismatch between the policy/management needs and research funding?
✓ How to achieve an ecosystem approach in marine research?

13:00-14:00 Lunch
